## **CLAIMS**

## What is claimed is:

1	1.	A method for translating documents in an apparel supply chain, comprising
2		the steps of:

- receiving a plurality of documents which include information reflecting services in an apparel supply chain, wherein the documents are received utilizing a network;
- 6 (b) translating the documents for the purpose of the processing thereof; and
- outputting the processed documents to the apparel supply chain utilizing the network.
- 1 2. The method as recited in claim 1, wherein the documents are updated in accordance with the processing thereof.
- The method as recited in claim 1, and further comprising precluding the translation of predetermined components of the information.
- 1 4. The method as recited in claim 1, wherein the documents are translated in accordance with process templates.
- The method as recited in claim 1, wherein the documents are translated to a predetermined language based on the process templates.
- 1 6. The method as recited in claim 1, wherein the network includes the Internet.
- 7. A computer program product for translating documents in an apparel supply chain, comprising:
- computer code for receiving a plurality of documents which include information reflecting services in an apparel supply chain, wherein the
- documents are received utilizing a network;

- 6 (b) computer code for translating the documents for the purpose of the
  7 processing thereof; and
  8 (c) computer code for outputting the processed documents to the apparel supply
- chain utilizing the network.
- 1 8. The computer program product as recited in claim 7, wherein the documents 2 are updated in accordance with the processing thereof.
- The computer program product as recited in claim 7, and further comprising computer code for precluding the translation of predetermined components of the information.
- 1 10. The computer program product as recited in claim 7, wherein the documents 2 are translated in accordance with process templates.
- 1 11. The computer program product as recited in claim 7, wherein the documents are translated to a predetermined language based on the process templates.
- 1 12. The computer program product as recited in claim 7, wherein the network includes the Internet.
- 1 13. A system for translating documents in an apparel supply chain, comprising:
- 2 (a) logic for receiving a plurality of documents which include information
- reflecting services in an apparel supply chain, wherein the documents are
- 4 received utilizing a network;
- 5 (b) logic for translating the documents for the purpose of the processing thereof;
- 6 and
- 7 (c) logic for outputting the processed documents to the apparel supply chain utilizing the network.

- 1 14. The system as recited in claim 13, wherein the documents are updated in accordance with the processing thereof.
- 1 15. The system as recited in claim 13, and further comprising logic for precluding the translation of predetermined components of the information.
- 1 16. The system as recited in claim 13, wherein the documents are translated in accordance with process templates.
- 1 17. The system as recited in claim 13, wherein the documents are translated to a predetermined language based on the process templates.
- 1 18. The system as recited in claim 13, wherein the network includes the Internet.
